

28-A Slide hammer set

DESCRIPTION

Slide hammer sets for extracting ball bearings and dowel pins from the 28 series are used for contactless extraction of internal bearings, bearing outer rings and bushes as well as components with threads (dowel pins, feather keys, bolts, etc.) in trade, workshops and industry. The multi-shell design of the internal extractors with their extra-large gripping edges enables the safe extraction of internal parts. The slide hammer supplied is used together with the internal extractors. The set also includes threaded inserts for extracting parts with centred threaded holes, which are used together with the slide hammer.

RANGE OF APPLICATION

For non-contact extraction of internal bearings, bearing outer rings and bushes as well as components with threads (dowel pins, feather keys, bolts, etc.)

BENEFIT

- Application-orientated compilation for universal use
- Storage in the box makes it easy to keep track of the completeness of the set
- Together with slide hammers and thread inserts, the internal extractors are able to find a suitable solution for a wide range of extraction situations
- Thanks to its design, the slide hammer enables optimum and safe stripping
- The threaded inserts allow internal extraction even where centred threaded holes would prevent normal internal extraction
- With the help of the dimensions lasered onto the thread adapters, threads can be clearly identified in practice

OPERATION

- Determine the internal diameter of the ball bearing and select a suitable internal extractor
- Insert the internal extractor into the hole and tighten the clamping nut
- If a support surface is available, select a counter stay, otherwise select a slide hammer
- Screw the slide hammer rod onto the wedge spindle of the internal extractor
- Use the slide hammer with a striking motion to pull out the bearing

MASTER DATA

GTIN [EAN]	4021176507779
Country of origin	DE
Case material	Tool steel
Series	28-A/B
Net weight [kg]	3,395 kg
Package contents	1 set
Packaging Act	PAP 21

SPARE PARTS

- 21-00_2-shell internal extractors
- 21-01_2-shell internal extractors
- 21-02_2-shell internal extractors
- 21-1_2-shell internal extractors
- 21-2_2-shell internal extractors
- 22-0-10_Gliding hammer device with 1 kg impact weight
