

# 43-2 Handy, 2-arm small parts puller with power-transmitting and self-centring puller legs

## DESCRIPTION

The handy 2-armed small parts puller with power-transmitting and self-centring puller legs is used for the sensitive removal of small bearings, gears and discs for narrow, hard-to-reach spaces. The compact and space-saving design of the puller with narrow legs that widen towards the claw is particularly suitable for electric motors. The free-moving pin on the T-handle guarantees comfortable, one-handed tightening of the spindle in the tightest of spaces.

## RANGE OF APPLICATION

For sensitive extraction of small bearings, gear wheels and discs for narrow, poorly accessible gaps

## BENEFIT

- Self-centring of the legs by manually tightening the spindle (Autogrip Technology)
- Integrated, free-moving pin on the T-handle guarantees manual spindle drive in the tightest of spaces
- Slim design of the legs makes it possible to reach places that are difficult to access
- No further tools are required for the pulling process

## OPERATION

- Position the puller leg on the part to be removed from the outside
- Swivel the claws under the component
- Pull the spindle manually under pressure to fix it
- Move the T-handle on the spindle head until the component is released

## MASTER DATA

GTIN [EAN]	4021176015861
Country of origin	DE
Case material	Tool steel
Series	43
Net weight [kg]	0,24 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes

## SPARE PARTS

- 43-1-T\_Traverse
- 43-2-70-P\_2 Pulling hooks (pair)
- 43-1-206\_Druckspindel
