

# 53-A Stud extractor set for tight spaces

## DESCRIPTION

The Series 53 stud extractor set is used to unscrew stud bolts or torn components in the automotive and industrial sectors. Stud extractors from Kukko are available in various diameters and designs. Thanks to its design, the 53 series can also be used in the tightest of spaces and is operated using a ring spanner or socket spanner. The set contains 4 different extractors with different diameters from 6 - 12 mm.

## RANGE OF APPLICATION

For removing stud bolts or torn components in the automotive and industrial sectors.

## BENEFIT

- Application-orientated compilation for universal use
- The grooved knurled wheel presses the stud bolt securely against the internal tothing
- When unscrewing, the stud bolt is in the area of the spanner and cannot break off

## OPERATION

- Position the stud bolt extractor on the stud bolt
- Drive the extractor using a ring spanner or socket spanner and safely unscrew the stud bolt

## MASTER DATA

GTIN [EAN]	4021176222801
Country of origin	DE
Case material	Tool steel
Series	53-A
Net weight [kg]	0,715 kg
Package contents	1 piece
Packaging Act	PP 05
